

Refund Policy

Sample e-commerce knowledge base document — Refunds

1. Refund Triggers

- Approved product returns after successful quality check.
- Order cancellations before dispatch.
- Non-delivery or lost-in-transit shipments confirmed by the courier.
- Price adjustments or promotional errors corrected after payment.

2. Refund Methods

Original Payment Method	Typical Processing Time
Credit/Debit Card	5–10 business days
Digital Wallet	1–3 business days
Bank Transfer	3–7 business days
Cash on Delivery	Refunded to bank account or wallet credit

3. Wallet Credit vs. Original Payment

Customers may sometimes be offered a choice between a wallet credit (instant) or a refund to the original payment method (slower, subject to bank processing).

4. Partial Refunds

Partial refunds may apply when only part of a multi-item order is returned, or when a restocking condition (e.g., missing accessory) applies.

5. Refund Status

Refund status can be checked under 'My Orders > Order Details > Refund Status'. If a refund is delayed beyond the stated window, customers are advised to contact support with the order ID.

This document is a sample / template policy created for knowledge-base and training purposes. It is not an official Daraz publication and should be reviewed and replaced with verified, up-to-date policy text before real-world use.
